Pflügers Archiv

European Journal of Physiology

Vol. 385 1980

Field Editors

P.-O. Åstrand, Stockholm · T. Brismar, Stockholm
E. E. Carmeliet, Leuven · R. Casteels, Leuven
J. Crabbé, Bruxelles · C. de Rouffignac, Gif-sur-Yvette
J. Durand, Paris · W. Hasselbach, Heidelberg
H. Hensel, Marburg · K. Hierholzer, Berlin
W. D. Keidel, Erlangen · N. A. Lassen, København
H. H. Loeschcke, Bochum · H. Meves, Homburg (Saar)
R. B. Moreton, Cambridge · H. Murer, Fribourg
A. Nizet, Liège · M. I. M. Noble, Midhurst
O. H. Petersen, Dundee · W. Precht, Frankfurt (Main)
H. Seller, Heidelberg · E. Simon, Bad Nauheim
L. Tauc, Gif-sur-Yvette · G. Thews, Mainz
K. Thurau, München · W. Trautwein, Homburg (Saar)
K. J. Ullrich, Frankfurt (Main) · E. Wetterer, Erlangen
M. Wiesendanger, Fribourg · J. Zachar, Bratislava
W. G. Zijlstra, Groningen

Subject Editors

E. Gerlach, München · P. Deetjen, Innsbruck
O. Pompeiano, Pisa

Coordinating Editor

F. Kreuzer, Nijmegen

Springer International

Pflügers Archiv · European Journal of Physiology

Founded in 1868 as „Pflügers Archiv für die gesamte Physiologie des Menschen und der Tiere" by *E. F. W. Pflüger*. Edited by *M. Verworn, E. Abderhalden, A. Bethe, R. Höber, A. v. Muralt, H. Rein* et al.

Published: Vol. 1–29 (1876) Bonn, Cohen und Sohn; Vol. 30–92 (1901) Bonn, E. Strauß; Vol. 93–170 (1917) Bonn, M. Hager; since Vol. 171 (1918) Berlin, Springer.

Since 1920 Pflügers Archiv has included: „Archiv für Physiologie" (Archiv für Anatomie und Physiologie, Physiologische Abteilung). Founded and edited by Johannes Müller, E. du Bois-Reymond, W. v. Waldeyer-Hartz et al. 1877–1914. Leipzig, Veit und Co., since 1915, Berlin, Vereinigung Wissenschaftlicher Verleger, afterwards Walter de Gruyter.

The exclusive copyright for all languages and countries, including the right for photomechanical and any other reproductions, also in microform, is transferred to the publisher.

The use of registered names, trademarks, etc. in this publication does not imply, even in the absence of a specific statement, that such names are exempt from the relevant protective laws and regulations and therefore free for general use.

Authors of this journal can benefit from library and photocopy fees collected by VG WORT if certain conditions are met. If an author lives in the Federal Republic of Germany or in West Berlin it is recommended that he contacts Verwertungsgesellschaft WORT, Abteilung Wissenschaft, Goethestrasse 49, D-8000 München 2, Federal Republic of Germany, for detailed information.

Die in der Zeitschrift veröffentlichten Beiträge sind urheberrechtlich geschützt. Alle Rechte, insbesondere das der Übersetzung in fremde Sprachen, vorbehalten. Kein Teil dieser Zeitschrift darf ohne schriftliche Genehmigung des Verlages in irgendeiner Form – durch Fotokopie, Mikrofilm oder andere Verfahren – reproduziert oder in eine von Maschinen, insbesondere von Datenverarbeitungsanlagen, verwendbare Sprache übertragen werden.

Auch die Rechte der Wiedergabe durch Vortrag, Funk- und Fernsehsendung, im Magnettonverfahren oder ähnlichem Wege bleiben vorbehalten.

Fotokopien für den persönlichen und sonstigen eigenen Gebrauch dürfen nur von einzelnen Beiträgen oder Teilen daraus als Einzelkopien hergestellt werden. Jede im Bereich eines gewerblichen Unternehmens hergestellte oder benützte Kopie dient gewerblichen Zwecken gem. § 54 (2) UrhG und verpflichtet zur Gebührenzahlung an die VG WORT, Abteilung Wissenschaft, Goethestrasse 49, D-8000 München 2, von der die einzelnen Zahlungsmodalitäten zu erfragen sind.

Autoren dieser Zeitschrift können unter gewissen Voraussetzungen in die Individualausschüttung von Mitteln aus der Bibliothektantieme und dem Fotokopieraufkommen mit einbezogen werden. Genaue Informationen erteilt die Verwertungsgesellschaft WORT, Abteilung Wissenschaft, Goethestrasse 49, D-8000 München 2.

Die Wiedergabe von Gebrauchsnamen, Handelsnamen, Warenbezeichnungen usw. in dieser Zeitschrift berechtigt auch ohne besondere Kennzeichnung nicht zu der Annahme, daß solche Namen im Sinne der Warenzeichen- und Markenschutz-Gesetzgebung als frei zu betrachten wären und daher von jedermann benutzt werden dürften.

Indexed in Current Contents

Subject Index

A

Acetylcholine receptor synthesis 37–43
Acid microclimate, jejunum 137–142
Active shortening in cardiac muscle 273–276
– sodium transport 181–187
Adipocytes 85–89
Adipose tissue 193–201
Adrenalectomy 29–36, 189–192
– (rat) 91–93
Adrenocorticostatic agent 25–28
Afferent oncotic pressure (π_A) 253–258
Airways occlusion control 259–261
Aldosterone 91–93, 181–187
– on epithelial leakiness 29–36
Alpha-bungarotoxin (α-BGT) 37–43
Alpha-melanocyte stimulating hormone (α-MSH) 79–84
Amacrine cells 51–64
Amiloride block of Na^+fluxes 243–251
Amino acids (GABA, glycine, taurine) 51–64
Anti-Natriuretic action of aldosterone 91–93
Apical and basolateral membrane 181–187
Arterio-venous shunt 203–209
ATPase method 223–228
Atrophy 147–153

B

Ba^{2+} on K-current 11–19
Basolateral membrane 181–187
Bicarbonate transport 143–146
Block, Ca channel, heart 175–179
Blood flow 193–201, 203–209
– pressure 65–70, 211–215
– vessels diameters 239–242
Breathing rate 269–271
Brown adipose tissue 193–201
Brush border 117–122

C

Caerulein 131–136
Caffeine 37–43
Calcium 37–43
– accumulation 85–89
– binding 85–89
– channel block 175–179
– -free perfusion 105–109
–, insulin release 217–222
– paradox 105–109
Capillary-to-fiber O_2 diffusion distance 223–228
Carbachol 131–136
Carbon dioxide partial pressure 143–146
Cardiac hypertrophy 155–160
– muscle 273–276
– output 65–70, 193–201
– – distribution 203–209
– – measurement 21–23
– pacemakers mechanism 11–19
Cardiorespiratory adjustments 65–70
Cardiovascular hemodynamics 203–209
Carotid artery pressure (CAP) 65–70
– blood 269–271
Central processing 123–129
– synapses 45–50
– vestibular neurons 123–129
Cerebellar fastigial and vermal cortex neurons 95–104
Cerebellum 95–104
Cold acclimation 155–160, 223–228
– or hypoxia on ventricular weights 155–160
Compensatory hypertrophy 161–165
Computer simulation 243–251
Converting enzyme inhibitor 211–215
CO_2 rebreathing 21–23
Corticosteroids 25–28
Corticosteroid, renal action 189–192
Creatine kinase 105–109
Cultured muscle cells 37–43

D

D 600 (methoxyverapamil) 175–179
Dantrolene (DaNa) 37–43
11-deoxycorticosteroid 25–28
Deoxycorticosterone (DOC) 25–28
Deuterium oxide 71–77
Dispersed pancreatic acinar cells 131–136
Distribution of sodium 243–251
Dual wavelength microspectrophotometer 167–173
Duodenum 117–122

E

Electrolytes, intracellular 1–10
Electron microprobe analysis 1–10
Ellipticity 223–228
EMG activity 263–268
Enzymatic microdissection 45–50
Epinephrine 131–136
Epithelial leakiness 29–36
Exercise 21–23, 65–70
– training 147–153

F

Facilitated diffusion of lactic acid 229–238
Fatty acid oxidation 111–116
Fick-principle for CO_2 21–23
Filtration pressure equilibrium 253–258
Flow of spinal cord temperature 269–271
Fluorescence 167–173
Furosemide 111–116

G

GABA 51–64
Gastrocnemius-soleus motoneurons 263–268
Gastrointestinal transport 137–142
– –, lactate + bicarbonate 143–146
Glomerular capillary pressure 253–258
– filtration rate 161–165
Glomeruli 253–258
Glucocorticoid hormones 189–192
– -induced atrophy 147–153
Glucose 137–142
– -induced insulin release 217–222
Glycine 51–64
Growth 155–160

H

Heart, Ca channel 175–179
– rate 65–70, 203–209
– weights 155–160
Hemodynamics 203–209
High output heart failure 203–209
Hodgkin-Huxley type kinetic 11–19
Horizontal linear acceleration 123–129
Hormone release, hypothalamus 79–84
Hyperpolarization activated current 11–19
Hypertensive rats 85–89
Hypertrophy, compensatory, renal 161–165
Hypothalamic synaptosomes 79–84
Hypothalamus 79–84
Hypothermia 105–109
Hypoxia acclimation 155–160
– on ventricular weights 155–160

I

Indirect Fick principle for CO_2 21–23
Infrared-spectrometric determination of D_2O 71–77
Inhibition by vinblastine 79–84
Intestine 143–146
Intracellular calcium concentration 37–43
– – distribution 85–89
– electrolyte concentrations 1–10
– measurements 181–187
Intracellularly injected neuraminidase 45–50
Inward current activated during hyperpolarization 11–19
Ionic currents in pacemaker cell 11–19
Isolated membranes, toad skin 181–187
– perfused rat heart 105–109

J

Jejunum in vitro 137–142

K

K^+deprivation 217–222
Kidney autoregulation 253–258
–, compensatory hypertrophy 161–165
–, phosphate reabsorption 189–192

L

Lactic acid diffusion 143–146
– acid transport, placenta 229–238
Luteinizing hormone releasing hormone (LHRH) 79–84

M

Macular vestibular input 95–104
Maternofetal exchange 229–238
Measurement of tissue fluorescense and reflectance 167–173
Medial cortico-nuclear zone 95–104
Mediated transport 229–238
Membrane calcium 85–89
Membranes of adipocytes 85–89
Mercury 117–122
Metopirone 25–28
Mice, obese 193–201
Microconductivity measurements 29–36
Microfluorescence photometry 167–173
Microreflectance photometry 167–173
Microspheres, radioactively labelled 193–201
Motoneurons 263–268
Multicompartment kinetic analysis 243–251
Muscle fiber cross section 223–228
– overload 147–153
– spindle primary afferents 263–268
– vibration 263–268
Myoglobin concentration 155–160

N

NADH-fluorescence 167–173
Na-dependent, carrier mediated phosphate transport 117–122
Natriuresis 111–116
Nephrectomy 161–165
Neuraminidase 45–50
Non-shivering thermogenesis 25–28, 193–201
Noradrenaline 193–201

O

Occlusion pressure 259–261
– – measurements 259–261
Osmotic behaviour 1–10
– – of toad skin epithelium 1–10
Otolith dynamics 123–129
– and canal inputs on nuclear vestibular neurons 123–129
Ouabain 131–136
Oxygen consumption 143–146
– uptake 65–70

P

Panting 269–271
Parathyroid hormone 189–192
Paracellular pathway 29–36, 243–251
Pancreatic acinar cells 131–136
Pancreas 217–222
4-Pentenoic acid 111–116
Perfused rat pancreas 217–222
Phosphate transport 117–122
Photoelectric measurement of vessel diameter 239–242
Picrotoxin 51–64
Placenta 229–238
Plasma renin activity 211–215
Polysynaptic reflex pathway 263–268
Potassium, insulin release 217–222
Pressure diameter relationship 239–242
Presynaptic nerve ending 45–50
Proton transfer 229–238
Proximal jejunum in vitro 137–142
– tubules 29–36, 189–192
Pulmonic circulation 65–70
Purkinje (P) cells 95–104

R

Radioactive microspheres 203–209
Rat heart 273–276
Receptive field 51–64
Receptor synthesis 37–43
Recruitment 147–153
Regional blood flow 193–201
Renal artery clip 211–215
– hypertension 211–215
– perfusion pressure (PP) 253–258
– phosphate reabsorption 189–192
– sodium excretion 91–93
– – reabsorption 111–116
– uptake of individual free fatty acids 111–116
Renin activity 211–215
Respiratory centers 259–261
Retinal ganglion cell responses 51–64
Rhythmic activity of blood vessels 239–242

S

Salinity adaptation 1–10
Sarcoplasmic reticulum 37–43
Shape changes of muscle fiber cross sections 223–228
Shortening deactivation 273–276
Single nephron filtration fraction 253–258
Sinoatrial node cell 11–19
Sinusoidal stimulation of macular vestibular receptors 95–104
– tilt 95–104
Skeletal muscle cultures 37–43
Slow calcium channel block 175–179
Small intestine, PO_4 influx 117–122
Smooth muscle 239–242
Sodium 117–122
– ion 137–142
– reabsorption 189–192
– transport 181–187, 243–251
– –, renal 91–93
– uptake, pancreatic cells 131–136
Spontaneously hypertensive rats 85–89
Steady state exercise 21–23
Stimulation of macular vestibular receptors 95–104
Stimulus-secretion coupling 217–222
Strychnine 51–64
Swimming 65–70
Substance P 131–136
Surface pH-measurements, small bowel 137–142
Synaptic transmission failure 45–50
Synaptosomes 79–84

T

Taurine 51–64
Tethered-swimming 65–70
Thermogenesis 193–201
Thermoregulatory heat production 25–28
Threshold amplitude of tilt 95–104
Tissue fluorescence and reflectance 167–173
Transport of electrolytes into serosal compartment 143–146
Triamcinolone 147–153
Thyroid hormone 91–93
Thyrotropin releasing hormone (TRH) 79–84
Toad skin 181–187
– – epithelium 1–10
Total body water 71–77
Transmitter release 45–50
Transport of inorganic phosphate 189–192
Tilt 95–104

U

Unidirectional influx of phosphate across mucosal membrane 117–122
Unilateral nephrectomy 161–165
Uptake of Na^+ 243–251
Urine flow 111–116

V

Vascular resistance 203–209
– smooth muscle 239–242
Ventricular myoglobin concentration 155–160
– weigth 155–160
Vestibular system 123–129
Vibration of the homonymous muscles 263–268
Vinblastine 79–84

W

Water intake 211–215
– turnover 71–77
Weight – lifting program 147–153

Advice to Authors

The illustrations that will appear in your contribution will be shown to best advantage if you follow the brief set of instructions below. Please read carefully. Thank you.

The Publisher

Preparation of Line Drawings

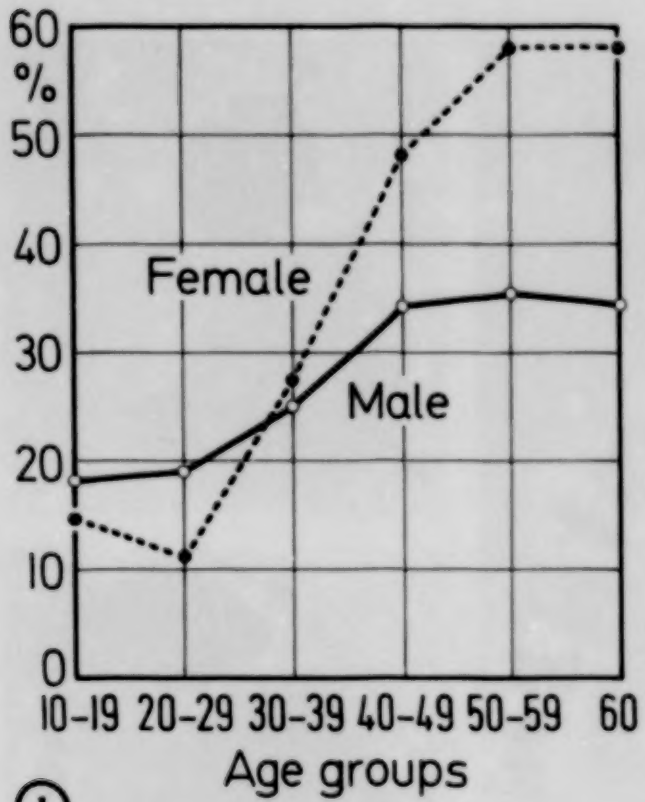
Illustration copy should be prepared to fit the format of the column or printed page (print area) so that 1:1 reproduction is possible. In case reduction is absolutely necessary, please state the alternative scale desired.
The publisher reserves the right to reduce or enlarge illustrations.

Drawings are to be twice the final size and executed in indelible black ink.

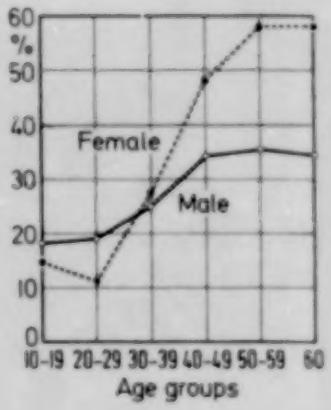
Important points to note: thickness of lines, size of inscriptions, size of measuring points, adequate spacing of shaded and dotted areas.

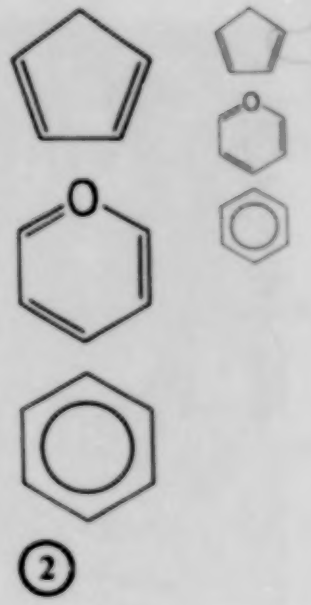
Words should be in upper- and lower-case characters, not capitals.

The following are optimal sizes as they finally appear in the journal:
Capital letters and numbers: 2 mm
Lower-case letters: 1.6 mm.



①





②

samples 1 to 5 show the original size and after 50% reduction

Selection of Illustration Material for Halftones (photographs, micrographs, X-rays, instrument traces etc.).

Photographs should be sharp, well-contrasted glossy prints of the original negative, trimmed at right angles. Halftone illustrations should be prepared to fit the format of the printed page (print area) so that 1 : 1 reproduction is possible. In case reduction is absolutely necessary, please state the alternative scale desired. The publisher reserves the right to reduce or enlarge illustrations.

Mark or crop marginal portions which are not required (at right angles, please).

Please see that illustrations which are to appear together are mounted accordingly as plates and that they correspond in size. Also they should not exceed the print area of the page, including room for the legend.

With X-rays, please indicate the significant parts on the back of the copy, or on an overlay.

Inscriptions, marks and scale lines should preferably be drawn neatly in black ink in an appropriate size on the face of the illustrations. Inscriptions should be about 3 mm high. Where Letraset is used, please handle it carefully and protect the photographs with an overlay.

Experimental Brain Research

ISSN 0014-4819 Title No. 221

Editorial Board: J. Altman, West Lafayette; P. Buser, Paris; A. Cowey, Oxford; O. Creutzfeldt, Göttingen; L. J. Garey, Lausanne; R. Jung, Freiburg i. Br.; D. M. MacKay, Keele; D. Ottoson, Stockholm; H. Thoenen, München; V. P. Whittaker, Göttingen; V. J. Wilson, New York

Research on the central nervous system has developed during the last 20 years into a broad interdisciplinary field. This journal covers the whole field of experimental brain research and thus reflects the variety of interests as represented by the International Brain Research Organization (IBRO): Neurobiology of the brain.

Fields of Interest: Neurophysiology, Sensory Physiology, Neuroanatomy, Neuropharmacology, Neuropathology, Neurochemistry, Neuroendocrinology, Cellular Biology, Developmental Neurobiology, Neuropsychology and the Behavioral Sciences.

Subscription Information:
1980. Volumes 38–40 (4 issues each). Sample copy upon request
North America:
1980: US $ 442.00, including postage and handling. Subscriptions are entered with prepayment only. Send your order or request to your bookseller or to:
Springer-Verlag, New York Inc., 175 Fifth Avenue, New York, NY 10010, USA
All other countries (except North America)
1980: DM 762,–, plus postage and handling. Send your order or request to your bookseller or directly to:
Springer-Verlag, P.O. Box 105 280, D-6900 Heidelberg 1, FRG
